

FLEXI-TAINER

The JWA Flexi-Tainer provides a simple, flexible and durable solution for the temporary or long-term storage of liquids and fresh water. Designed for rapid deployment, it ensures safe containment of water, fuels, chemicals and other liquids in diverse operational environments.

Application:

- Liquid storage for water, fuels, chemicals and pollutants.
- Suitable for military, emergency response, humanitarian aid and industrial or commercial use.
- Ideal for temporary or semi-permanent storage where space and portability are key.

Key Features:

- Made from tough PVC fabric with a load-bearing polyester scrim, PVC-coated for UV protection and long service life.
- Radio Frequency (RF) welded seams ensure superior strength and leak resistance.
- Safe Operation: Equipped with pressure relief valves to prevent overfilling.
- Can be fitted with ball valves with quick-release couplings for simple filling and discharge.
- Available with a range of valves and fittings.
- Supplied complete with a 2" BSP Butterfly valve and repair kit.
- JWA offers bespoke design and manufacturing to meet specific storage requirements.
