

CYLINDRICAL TOTALLY ENCLOSED LIFTBAG

Remote inflation and deflation of JWA Totally Enclosed Cylindrical bags increases safety and provides lifting options for a wide range of applications.

Application:

- Shallow water operations
- Surface flotation tasks
- Draft reduction
- Towing support
- General lifting and buoyancy assistance

Key Features:

- Safe Remote Inflation/Deflation enhances operational safety and provides flexible deployment options.
- Strategically positioned shackles and heavy-duty webbing straps allow for balanced lifting of irregularly shaped loads.
- Ready-to-Use as they're supplied fully assembled with a user manual and service record book.
- Can be used in conjunction with lifting beams for additional support.

Model Name	Part Number	Capacity	Overall Height(M)	Overall Diameter (M)
