

FLEXI-DAM

The JWA Flexi-Dam is a self-supporting liquid containment system featuring an inflatable collar for instant deployment. Designed for rapid response, it provides a safe and versatile solution for holding water, fuels, chemicals, and pollutants in diverse environments.

Application:

- Emergency response and spill containment for water, fuels, and chemicals.
- Ideal for fire-fighting, disaster relief, and environmental protection.
- Widely used by emergency services and industrial teams worldwide for rapid liquid containment.

Key Features:

- Inflatable collar ensures quick setup and stable operation without external support.
- Easy to transport and stow therefore perfect for rapid deployment in emergency situations.
- Radio Frequency (RF) welded for superior strength and leak-proof integrity.
- Available in heavy-duty or food-grade fabrics with a choice of valves and connection fittings.

Part Number	Capacity (L)	Height (M)	Depth (M)	Diameter (M)
710031	500	0.80	0.90	1.30
711512	1000	0.80	1.00	1.50
711536	2000	1.00	1.20	2.00
710039	3000	1.00	1.50	2.40
711539	5000	1.20	1.87	2.75
