

## LIFEBOAT TEST KITS

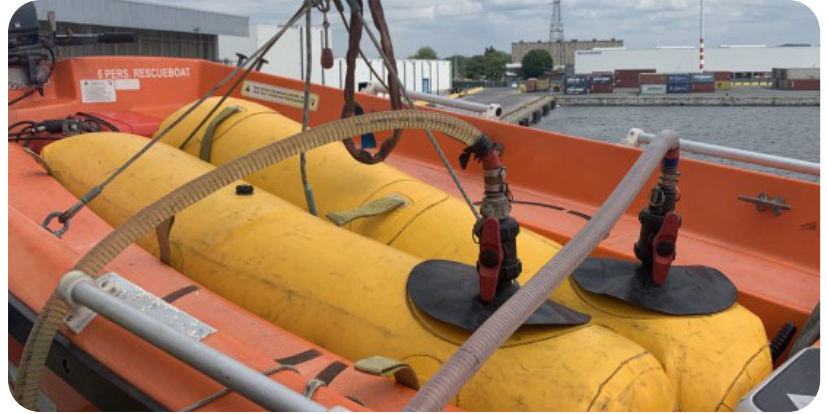

The JWA Lifeboat Test Kit provides a complete, safe, and efficient solution for accurate water weight load testing of lifeboats, walkways, and structural installations. Designed for ease of handling and durability, it ensures precise results and long service life in demanding marine environments.

### Key Features:

- Complete Testing Solution: Includes all components required for reliable water weight load testing of lifeboats and structures.
- Test bags made from tough PVC fabric with a load-bearing polyester scrim, PVC-coated for UV resistance and long-term durability.
- Available in 75kg to 500kg sizes for varied testing applications.
- Precision-engineered hoses, manifolds, and pumps built from premium materials for strength and value.
- Delivered with operating instructions and certification as required.

A complete testing solution, supplied ready for use with all necessary components:

- Aluminium air powered diaphragm water pump
- Air hose for pump supply
- 16 way manifold for controlled water filling
- Suction Fill Hose
- Discharge Hose
- Filling Hose Set - 4 x 6m - 4 x 5m - 4 x 4m - 4 x 3.5m
- 16 x 375kg Lifeboat test bags
- Supplied in 2 x rigid plastic pallet boxes -

Model	Part Number	Load Capacity (KG)
LB75KG	712723	75
LB100KG	712724	100
LB226KG	712725	226
LB375KG	712726	375
LB500KG	712727	500
