

PREMIER PIPE LAYING BAGS

The Premier SPLB is a durable, enclosed lift bag designed for safe, efficient subsea lifting and load-through operations, even at off-angles. Its robust construction ensures reliable performance for marine and offshore applications.

Model Name	Part Number	Capacity	Overall Height(M)	Overall Diameter (M)
SPLB01	713354	1000KG	1.76	1.00
SPLB02	713355	2000KG	1.94	1.31
SPLB03	713073	3000KG	2.20	1.54
SPLB04	713353	4000KG	2.62	1.67
SPLB05	713145	5000KG	2.78	1.76
SEF193	712522	193KG	1.20	0.46

Application:

- Designed for subsea lifting and support operations, particularly where off-angle lifting and load-through capability are required. It provides an efficient and reliable solution for cable and pipeline laying, shore-end installation, and general subsea lifting tasks.

Key Features:

- Single Point Liftbag with an internal load bearing strop connecting the two stainless steel end fitting attachment rings.
- Off-Angle and Through-Lift Capability: Enables stable handling of loads at varying angles, ideal for cable and pipeline operations.
- Made from tough 3-ply PVC fabric reinforced with a structural polyester scrim, PVC-coated on both sides for UV resistance and long service life.
- Radio Frequency (RF) welded seams ensure superior strength and airtight integrity.
- Manufactured in accordance with IMCA D-016 Rev 4:2015 and independently tested to meet the industry's safe working load ratio.
