

PIPE STOPPERS & BUNGS

The JWA Premier Pipe Stopper range offers a fast, reliable solution for temporary sealing and flow restriction in pipes, ducts, and tunnels, supporting safe construction, maintenance, and repair. Bespoke designs are available for specific project needs.

Application:

- Temporary sealing and stopping/restriction of flow in pipes, ducts, and tunnels.
- Supports construction, maintenance, and repair of installations and facilities.
- Suitable for a wide range of marine, offshore, and industrial projects.

Key Features:

- Made from PVC fabric.
- Radio Frequency (RF) welded seams provide superior strength and integrity.
- Supplied with 3/4" BSP inflate/deflate valve, Pressure Relief Valves (PRVs), and anchor/handling tabs.
- Fully bespoke designs available to meet specific operational needs.

Part Number	Diameter (M)	Length (M)
712367	0.762	1.00
712368	0.812	1.00
712369	0.915	1.00
712157	1.20	1.35
712363	1.60	2.65
712362	2.00	2.65
711994	4.00	5.00
712053	8.00	5.00
712896	12.00	5.00
